

What makes us different

- You have the arduous task of listening to multiple sales pitches, and while everyone will tell you why they are different, we would like to show you real examples of how some current employers are bending the healthcare cost curve.
- After hearing about how we were significantly reducing health insurance costs for our current employers, [Patient Rights Advocate \(PRA\)](#) asked if they could capture our clients' success stories. PRA has been creating videos to showcase how real price transparency and direct contracting are lowering costs for innovative employers nationwide. **The group has shared these videos with Health and Human Services (HHS) Leadership and the White House Administration to highlight successful price transparency models in action and to support the need for real transparency. PRA was instrumental in getting [The Hospital Price Transparency Rule](#) passed that went into effect on January 1, 2021.**
- We join PRA in the belief that patients deserve to know real prices and have a trusted, competitive marketplace in healthcare. The organization's leadership has a front row seat at the White House and in all proposed healthcare legislation generated from Washington D.C. Thus, we are honored to be part of their message. Please take a minute to view the videos on the next few pages by clicking the links to see how we are significantly reducing employers' healthcare costs while improving employees' clinical outcomes.
